This session is for the recently accepted teacher candidates who will be participating in the Grow Your Own program during the 2019-2020 school year. The Grow Your Own program is established to support teacher candidates and administrators in West Oso ISD, so teacher candidates can meet their cooperating teachers and administrators.

**Roundtable discussion**

Get to know students’ challenges and instructional needs when teaching writing, and learn what to expect from ESL students. We will discuss best practices for English language acquisition and help you feel confident teaching writing to all levels, from ESL to advanced English learners.

All educators are faced with creating effective accommodations for students with individual and specific needs. Come out the “Peer Buddy” concept in action. Roundtable discussion among cooperating teachers will share how they have tackled this challenge and have used different strategies to implement these strategies in their classroom.

**POSTER SESSION: 10:30 am, UC 142**

**Tech in the 21st Century: Using Google Classroom and Kahoot to acquire writing skills in a middle school classroom** - Ms. Michele Cantera

Learn effective and engaging ways to integrate popular culture and media in the secondary classroom to support literacy development. Explore a way to integrate technology within a professional team while addressing your individual professional development needs as aligned to national standards.

In this session, we will explore emerging trends and skills for the 21st-Century workplace. We will share information about a tutorial program. Islanders Helping the Early Acceleration of Readers Together (iHEART): Sustaining a school-university partnership through a reading tutorial program.

We will share information about a tutorial program. Islanders Helping the Early Acceleration of Readers Together (iHEART): Sustaining a school-university partnership through a reading tutorial program.

**SESSION II: 11:00–11:40 am**

**Revitalizing professional practice in math & science with interactive and multimedia activities**

Learn effective and engaging ways to integrate popular culture and media in the secondary classroom to support literacy development. Explore a way to integrate technology within a professional team while addressing your individual professional development needs as aligned to national standards.
